There are more than 28 million small businesses in the United States, making up a whopping 99.7 percent of all U.S. businesses, according to the Small Business Administration. When you consider some of the most popular reasons to start a business, including having a unique business idea, designing a career that has the flexibility to grow with you, working toward financial independence, and investing in yourself - it's no wonder that small businesses are everywhere. But not every small business is positioned for success. In fact, only about two-thirds of businesses with employees survive at least two years, and about half survive five years. So you may be in for a real challenge when you decide to take the plunge, ditch your day job, and become a business owner. The stage is often set in the beginning, so making sure you follow all of the necessary steps when starting your business can set the foundation for success. Here are 10 steps that are required to start a business successfully. Take one step at a time, and you'll be on your way to successful small business ownership. Step 1: Do Your Research Most likely you have already identified a business idea, so now it's time to balance it with a little reality. Does your idea have the potential to succeed? You will need to run your business idea through a validation process before you go any further. In order for a small business to be successful, it must solve a problem, fulfill a need or offer something the market wants. There are a number of ways you can identify this need, including research, focus groups, and even trial and error. As you explore the market, some of the questions you should answer include: Is there a need for your anticipated products/services? Who needs it? Are there other companies offering similar products/services now? What is the competition like? How will your business fit into the market? Don't forget to ask yourself some questions, too, about starting a business before you take the plunge. Step 2: Make a Plan You need a plan in order to make your business idea a reality. A business plan is a blueprint that will guide your business from the start-up phase through establishment and eventually business growth, and it is a must-have for all new businesses. The good news is that there are different types of business plans for different types of businesses. If you intend to seek financial support from an investor or financial institution, a traditional business plan is a must. This type of business plan is generally long and thorough and has a common set of sections that investors and banks look for when they are validating your idea. If you

don't anticipate seeking financial support, a simple one-page business plan can give you clarity about what you hope to achieve and how you plan to do it. In fact, you can even create a working business plan on the back of a napkin, and improve it over time. Some kind of plan in writing is always better than nothing.

Step 3: Plan Your Finances Starting a small business doesn't have to require a lot of money, but it will involve some initial investment as well as the ability to cover ongoing expenses before you are turning a profit. Put together a spreadsheet that estimates the one-time startup costs for your business (licenses and permits, equipment, legal fees, insurance, branding, market research, inventory, trademarking, grand opening events, property leases, etc.), as well as what you anticipate you will need to keep your business running for at least 12 months (rent, utilities, marketing and advertising, production, supplies, travel expenses, employee salaries, your own salary, etc.). Those numbers combined is the initial investment you will need. Now that you have a rough number in mind, there are a number of ways you can fund your small business, including: Financing Small business loans Small business grants Angel investors Crowdfunding

At age seventeen Fred DeLuca borrowed \$1,000 from a friend and started SUBWAY(R). Today, with more than 38,000 stores in one hundred countries and annual sales exceeding \$16.6 billion, Fred DeLuca's SUBWAY is a success story with a message... **START SMALL FINISH BIG** Publishers Weekly Review: DeLuca was only 17 when he started what is now the Subway restaurant chain in 1965; he needed money to attend college and a friend offered to back him with \$1,000 to start a sandwich shop in Bridgeport, Conn. That beginning led DeLuca to an enormously successful career: in addition to being president of the chain, he runs MILE, a nonprofit organization that offers loans to entrepreneurs. According to DeLuca, there are 15 essential principles for anyone starting a small business, some of which, DeLuca confesses, he learned the hard way (he had never made a submarine sandwich before opening day of his first shop). Among these pillars: Believe in Your People; Never Run Out of Money; Keep the Faith; and Profit or Perish. DeLuca uses his own business experience as well as that of other successful entrepreneurs. A.e.g., the founders of Kinko's and Little Caesar's. In addition to those of less well-known business people. Written in a conversational style, the advice isn't especially original or creative. However, would-be millionaires who are sitting at their kitchen table wondering if they should take that big step and start a business will find the book both instructive and inspirational. Agent, Bob Diforio. Library Journal DeLuca, co-founder in 1965 of SUBWAY Restaurants and founder in 1996 of the Micro Investment Lending Enterprise (MILE), a nonprofit organization making microloans to entrepreneurs/microentrepreneurs, has written this humorous, down-to-earth guide to success as a small business owner. Coauthor Hayes is a writer (Computer Architecture and Organization, 1998), public speaker, and business trainer. Each chapter describes one of DeLuca's 15 key lessons and is illustrated with a real-life case study. None of the people in these cases is a household name, but businesses such as Kinkos, Little Caesars, and SUBWAY are. DeLuca doesn't claim that his guides form a master plan for success, but he optimistically believes that anyone can become Bill Gates, Lillian Vernon, or Henry Lay and that his lessons will increase the chances. His book also promotes and supports MILE, and the last chapter and appendix are devoted to information about it and its programs. Recommended for most small business collections. Susan C. Awe, Univ. of New Mexico Lib., Albuquerque
