Define woodcut. woodcut synonyms, woodcut pronunciation, woodcut translation, English dictionary definition of woodcut. n. 1. A block of wood on whose surface a design for printing is engraved along the grain. 2. A print made from a woodcut.

Woodcut is a relief printing technique in which text and/or images are carved into the surface of a block of wood. The printing parts remain level with the surface while the non-printing parts are removed, typically with a knife or chisel. The wood block is then inked and the substrate pressed against the wood block.

WOODCUT offers engineered, machined nosings along with stair nosing with brass or silver inserts for mitre protection. The machined nosing acts like a solid nosing and is rounded on the edge to protect from chipping, but doesn't come with the bowing issues like solid, which is also not a sturdy, sustainable option for stair nosing.

Woodcut

Woodcut is a relief printing technique in printmaking. An artist carves an image into the surface of a block of wood—typically with gouges—leaving the printing parts level with the surface while removing the

non-printing parts. Areas that the artist cuts away carry no ink, while characters or images at surface level carry the ink to produce the print.

Dürer's Rhinoceros is the name commonly given to a woodcut executed by German painter and printmaker Albrecht Dürer in 1515. The image is based on a written de-

scription and brief sketch by an unknown artist of an Indian rhinoceros that had arrived in Lisbon in 1515. Dürer never saw the actual rhinoceros, which was the first living example seen in Europe since Roman times.

Dürer's Rhinoceros - Wikipedia

Originally, woodcut was a facsimile process; i.e., the cutting was a reproduction of a finished design. With most contemporary woodcuts, however, the artist creates his design in the process of cutting. As wood is a natural material, its structure varies enormously and this exercises a strong influence on the cutting.
